PROJECTS

SurveyScope: Interactive EDA Dashboard for Survey Data | [GitHub](#)

May'25 - Jun'25

- Engineered a Python desktop application using Tkinter to streamline and automate survey data cleaning and preprocessing workflows.
- Implemented automated handling of missing values, data validation, and format standardization, reducing manual effort with minimal user input.
- Designed a no-code, intuitive GUI with interactive visualizations to analyze trends and correlations for users of all technical backgrounds.

Tech Stack - Python, Tkinter, Pandas, NumPy, Matplotlib, Data Validation Techniques.

AI- Voice Acting Bot | [GitHub](#)

Mar'25 - Apr'25

- Designed a C++ conversational agent that produces vocal-style replies using rule-driven text flow logic, capable of simulating human-like conversation patterns.
- Applied phrase-pattern recognition to accurately interpret diverse user inputs and generate coherent, contextually appropriate message output.
- Added context retention so the bot can reference earlier exchanges, enabling smoother, natural dialogue continuity.

Tech Stack - C++, STL, Rule-Based Logic, Pattern Matching, Context Tracking.

TRAINING

Cipher Schools- Data Structures and Algorithm

Jun'25 - Jul'25

- Developed a Java-based Library Management System for book records and issue/return operations.
- Implemented CRUD operations and search functionality using core Java data structures.
- Applied basic validation and control flow logic to ensure accurate record updates and availability tracking.

Tech Stack - Java, Core Java, OOPs, Collections Framework.
